

David E West Park Pond Enhancements

Flooding Relief FY2017, District 7

Estimated cost: \$925K

- **JUSTIFICATION:**

Attenuation storage is needed in this area because it is a closed basin with limited receiving capacity in the receiving sink. Multiple flooding complaints have been received.

- **PROJECT DESCRIPTION:**

The project consists of the construction of a stormwater pond, pipes, and inlets on City lands. The pond will be hydraulically equalized with an existing stormwater pond, thus providing additional back-up volume to relieve downstream flooding

- **RELATED ISSUES:**

North Tampa Closed Basin model was utilized for design.
