Total Budget:

\$4,691,857.00

Disasters:**Declaration Number**

NSP

Narratives**Summary of Distribution and Uses of NSP Funds:**

Acquisition, rehabilitation of foreclosed single family and multi-family properties in the South Gandy target Area.

, Approximately \$1.94 million will be used for acquisition and related costs

, Approximately \$2.28 million will be used for rehabilitation and related costs

, \$469,186 will be use for administrative costs

, Approximately \$2.8 million will be set aside for households earning up to 50%AMI. The rental properties will be reserved for those clients.

How Fund Use Addresses Market Conditions:

The Tampa market demands more affordable rental units. Home ownership opportunities will be funded with NSP3, however the focus will be on multi-family.

, Funding set aside for households at or below 50% of AMI will be for the creation of rental housing. The City past experience in address the needs of low income households is that the rental housing is the preferred method. The continued flat for sale housing market has made acquisition and rehabilitation of foreclosed properties the City's priority. The City will require that projects selected for rental activities must include the capacity for providing rental property management and supportive services. Partners utilizing NSP-funded properties for rental housing programs shall demonstrate sufficient capacity and resources to provide for ongoing program operating costs. The City will also require that any potential multi-family rental development proposals be reviewed by the City's approved underwriter for financial feasibility.

Ensuring Continued Affordability:

The City of Tampa will ensure continued affordability for NSP-assisted housing through the use of deferred payment loan mortgage and note documents that will be recorded against each property. If an owner who has been assisted through this program transfers title to the property before the affordability period expires, the assistance provided through the City's NSP program will be subject to recapture. The City will annually monitor all properties that are assisted with NSP funds during the affordability period to ensure that the specified units remain affordable, and that the property(s) continue to meet minimum housing quality standards. In addition, all properties acquired through the NSP funding program will be secured by a recorded deferred payment loan mortgage and note in favor of the City, and monitored by the City on an annual basis.

, The City will use the minimum affordability period of the federal HOME Investment Partnership Program, 24 CFR 92.252(a), (c), (e) and (f),

and 92.254. The City will annually monitor these periods of affordability for income compliance and HQS. The minimum affordability period is listed below:

- Up to \$15,000 = 5 Years
- \$15,001 - \$40,000 = 10 Years
- Over \$40,000 = 15 Years
- New Construction = 20 Years

Definition of Blighted Structure:

(1) Definition of "blighted structure" in context of state or local law.

Response: A structure is blighted when it exhibits objectively determinable signs of deterioration sufficient to constitute a threat to human health, safety and public welfare. Blighted structures located within any historic districts will be given appropriate consideration regarding historic preservation standards and regulations. Section 19.02 of Article XIX of the City's Code of Ordinances addresses slum and blighted areas as being "injurious to the public health, safety, morals and welfare of the residents of said municipality; that the existence of such areas contributes substantially and increasingly to the spread of disease and crime, constitutes an economic and social liability imposing onerous municipal burdens which decrease the tax base and reduce tax revenues, substantially impairs or arrests the sound growth of said municipality, retards the provision of housing accommodations, aggravates traffic problems and substantially impairs or arrests the elimination of traffic hazards and the improvement of traffic facilities" Contributing nuisance conditions are defined in Section 19.03 of the City's Code of Ordinances that includes any one, or a combination of the following:

- Any public nuisance known at common law or in equity jurisprudence or as provided by the statutes of the state or ordinances of the city, including this chapter;
- Physical conditions dangerous to human life or detrimental to health or persons on or near the premises where the condition exists;
- Unsanitary conditions or anything offensive to the senses or dangerous to health;
- Whatever renders air, food or drink unwholesome or detrimental to the health of human beings; and
- Fire hazards

Definition of Affordable Rents:

The maximum Affordable Rents shall not exceed the State of Florida's State Housing Initiative Partnership Program (SHIP) Rents as published annually by the Florida Housing Finance Corporation (FHFC) for the Tampa-St. Petersburg-Clearwater Metropolitan Statistical Area (MSA). The City has adopted the FHFC maximum affordable rent limits for use in NSP-funded programs. The City will review and approve the rents charged on an annual basis, as they are updated by the Florida Housing Finance Corporation.

Housing Rehabilitation/New Construction Standards:

The intent of the City's HCD Standards for Rehabilitation is to correct sub-standard conditions with the City of Tampa's housing stock so that dwellings are safer, healthier, more durable, more affordable, more energy efficient, and more habitable. HCD intends for rehabilitation to correct a broad range of conditions that afflict the housing stock. Rehabilitation should address more than those conditions that threaten the immediate "health and safety" of the occupants. It should include correcting conditions that will create a future hazard, that make the dwelling less useful and less affordable to the occupant, and that reduce the dwelling's long-term habitability.

The City of Tampa's Housing and Community Development (HCD) Rehabilitation Standards will be used to describe in detail the specifications for the rehabilitation work needed to bring substandard housing into compliance with City Codes, which define the minimum housing code for the City of Tampa. Chapter 5 of the City Building Code adopts the Florida Building Code. Chapter 1 of the Florida Building code is amended and is used as the basis for Chapter 5 of the City Code. It is the contractor's responsibility for correcting any visible existing code violation that may have been omitted in the write-up of specifications and for all labor, materials, equipment, permits, licenses and services for the proper completion of the rehabilitation project.

o All gut rehabilitation or new construction (i.e., general replacement of the interior of a building that may or may not include changes to structural elements such as flooring systems, columns or load bearing interior or exterior walls) of residential buildings up to three stories must be designed to meet the standard for Energy Star Qualified New Homes.

o All gut rehabilitation or new construction of mid -or high-rise multifamily housing must be designed to meet American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) Standard 90.1-2004, Appendix G plus 20 percent (which is the Energy Star standard for multifamily buildings piloted by the Environmental Protection Agency and the Department of Energy).

o Other rehabilitation must meet these standards to the extent applicable to the rehabilitation work undertaken, e.g., replace older obsolete products and appliances (such as windows, doors, lighting, hot water heaters, furnaces, boilers, air conditioning units, refrigerators, clothes washers and dishwasherstar-46 labeled products.

o Water efficient toilets, showers, and faucets, such as those with the WaterSense label, must be installed.

o Where relevant, the housing should be improved to mitigate the impact of disasters (e.g., earthquake, hurricane, flooding, fires).

NSP Recommended Energy Efficient and Environmentally-Friendly Green Elements- New construction and gut rehabilitation activities should exceed the Energy Star for New Homes standard. Moderate rehabilitation or energy retrofits will purchase only Energy Star products and appliances. NSP homes may achieve an established environmental or energy efficiency standard such as Green Communities or equivalent.

Re-Use Cleared Sites - Re-use cleared sites must be redeveloped in accordance with a comprehensive or neighborhood plan. Plans will be developed to re-use all demolition sites as replacement housing, for use as a community resource, or to provide an environmental function. Examples include community gardens, pocket parks, or floodplain impoundment areas.

Deconstruction - Deconstruction will include salvaging and reusing materials resulting from demolition activities. Building materials shall be recycled.

Renewable Energy - 1. Passive Solar. Orient the building to make the greatest use of passive solar heating and cooling.

2. Photovoltaic-ready. Site, design, engineer and wire the development to accommodate installation of photovoltaic panels in the future.

Sustainable Site Design- New Construction- 1. Transportation Choices. Projects shall be located within a one-quarter mile of at least two, or one-half mile of at least four community and retail facilities.

2. Connections to Surrounding Neighborhoods. Provide three separate connections from the development to sidewalks or pathways in surrounding neighborhoods.

3. Protecting Environmental Resources. Do not locate the project within 100 feet of wetlands; 1,000 feet of a critical habitat; or on steep slopes, prime farmland or park land.

4. Erosion and Sediment Control. Implement EPA's Best Management practices for erosion and sedimentation control during construction.

5. Sustainable Landscaping. Select native trees and plants that are appropriate to the site's soils and microclimate.

6. Energy Efficient Landscaping. Locate trees and plants to provide shading in the summer and allow for heat gain in the winter.

Water Conservation - 1. Efficient Irrigation. Install low volume, non-spray irrigation system (such as drip irrigation, bubblers, or soaker hose).

Energy Efficient Materials - 1. Durable Materials. Use materials that last longer than conventional counterparts such as stone, brick or concrete.

2. Resource Efficient Materials. Use layouts and advanced building techniques that reduce the amount of homebuilding material required.

3. Heat Absorbing Materials. Use materials that retain solar heat in winter and remain cool in summer.

4. Solar-Reflective Paving. Use light colored/ high-albedo materials and/or open-grid pavement with a minimum Solar Reflective index of 0.6 over at least 30 percent of the site's hardscaped areas.

5. Local Source Materials. Use materials from local sources that are close to the job site.

6. Green Roofing. Use Energy Star compliant and high-emissive roofing, and/or install a Green (vegetated) roof for at least 50 percent of the roof area; or a combination of high-albedo and vegetated roof covering 75 percent of the roof area.

Healthy Homes - 1. Green Label Certified Floor Covering. Do not install carpets in basements, entryways, laundry rooms, bathrooms or kitchens; if using carpet, use the Carpet and Rug Institute's Green Label certified carpet and pad.

2. Healthy Flooring Materials: Alternatives. Use non-vinyl, non-carpet floor coverings in all rooms.

3. Healthy Flooring Materials: Reducing Dust. Install a whole-house vacuum system with high-efficiency particulate air filtration.

4. Sealing Joints. Seal all wall, floor and joint penetrations to prevent pest entry; provide rodent and corrosion proof screens (e.g., copper or stainless steel mesh) for large openings.

5. Termite-Resistant Materials. Use termite resistant materials in areas known to be infested.

6. Tub and Shower Enclosures: Moisture Prevention. Use one-piece fiberglass or similar enclosure or, if using any form of grouted material,

use backing materials such as cement board, fiber cement board, fiberglass reinforced board or cement plaster.

7. Green Maintenance Guide. Provide a guide for homeowners and renters that explains the intent, benefits, use and maintenance of Green building features, and encourages additional Green activities such as recycling, gardening and use of healthy cleaning materials.

8. Resident Orientation. Provide a walkthrough and orientation to the homeowner or new tenants.

All housing that requires rehabilitation must meet local building codes, including the Standard Southern Building Code (SBCCI), and ordinances pertaining to providing housing that is decent, safe, sanitary, and fit for habitation. Structures located within certain historic districts will be given appropriate consideration regarding historic preservation standards and regulations.

Vicinity Hiring:

The City will, to the maximum extent possible, provide for vicinity hiring by maintaining a list of approved Small and Local Business Enterprises located within the City limits. In addition, the City will work with local Not-For-Profits and the Tampa Housing Authority to identify workers from local vicinity.

Procedures for Preferences for Affordable Rental Dev.:

The NSP3 program requires at least 25% of total NSP3 allocation to be used to provide housing for individuals or families whose incomes do not exceed 50 percent of AMI. The City's NSP3 funding set-aside for households at or below 50% of AMI will be used for the creation of rental housing. The City's Real Estate Department has identified three (3) available multi-family rental projects in the Gandy South NSP3 target area having a combined total of 130 units. In addition, in the NSP 1 multi-family RFP that was issued in February, 2010, a total of five (5) properties in this target area were submitted.
