

## Copeland Park Mace in

### Flooding Relief FY2018; District 7 M

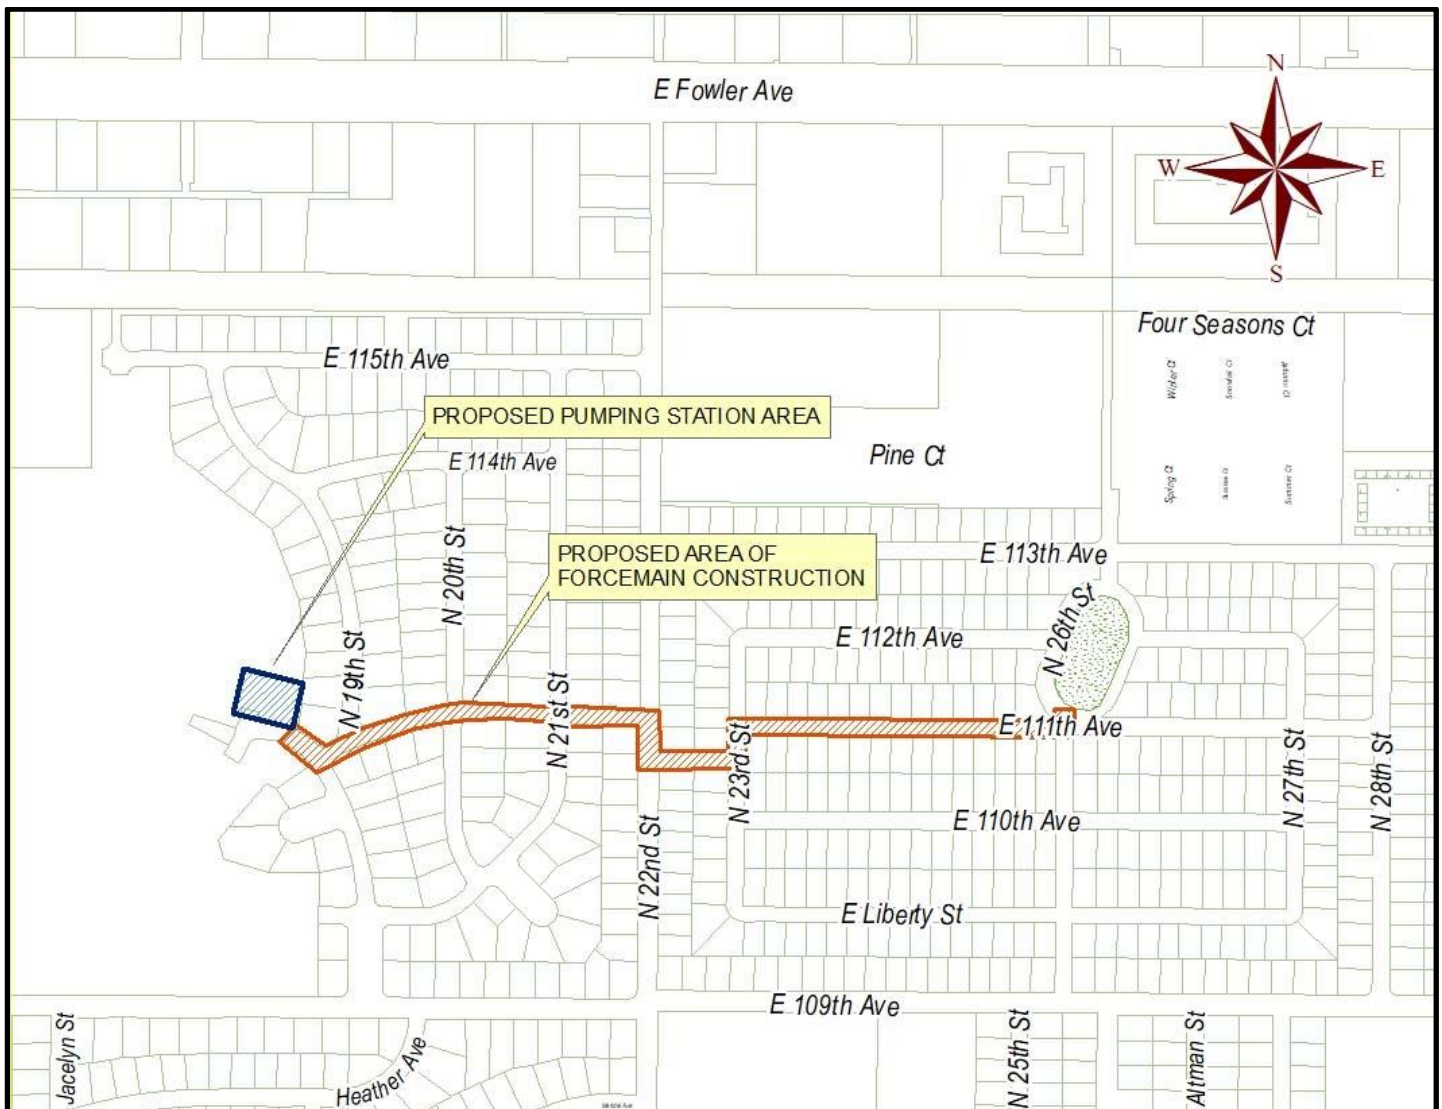

Estimated cost: \$600K

#### Project Description:

Currently a temporary pump is utilized to drain the low-lying area in Copeland Park. A permanent M pumping station is proposed to replace the temporary pump and provide a more reliable system to M better alleviate the flooding in the area.

The project consists of construction of new force main connecting Copeland Pumping Station to the M existing drainage system on E 111<sup>th</sup> Ave. and N 26<sup>th</sup> St. area. M
