Upcoming Construction Project Affecting Your Area

315 E. Kennedy Blvd.
Tampa, FL 33602-5211

The City of Tampa is hosting a public meeting to provide citizens an update on upcoming construction for the **Hyde Park Groundwater Diversion Project**.

This neighborhood enhancement project, located in the Hyde Park Preservation Inc. neighborhood, is a continuation of efforts to address chronic nuisance ponding issues on sidewalks and streets associated with groundwater seepage. This project provides for the installation of underdrain systems along each side of the roadway. The new underdrain systems will be connected to the existing inlets along Bayshore Boulevard for discharge to Hillsborough Bay.

Members of the City of Tampa's Mobility Department will discuss project and construction plans, preservation of historic elements and trees, as well be available to answer any questions and address concerns.

For more information about the meeting and overall project details, scan the QR Code or call the Project hotline at 813-274-8469.
