

Terrace Park Pond Overflow aka Bougainvillea Pond Overflow

Flooding Relief ; District 7

Estimated cost: \$75K

Project Description:

The existing pond located at the intersection of 46th Street and Bougainvillea Avenue does not have an outfall. The pond overflows and floods the adjacent properties and streets after heavy rainfall. The proposed project will provide an outfall for the pond to alleviate the flooding. The project includes the installation of control structure for the pond with pipes connecting it to the existing system on Bougainvillea Avenue.
