

Okara Road & 26th Street Force Main

Flooding Relief; District 7

Estimated cost: \$90K

Project Description:

Currently the pond located at Okara Road and 26th Street outfalls via a temporary pump and force main system that discharges to the Mary Sink causing flooding under certain storm events. The proposed project will re-route the force main system as depicted in the map below. This will provide more capacity for the Mary Sink by diverting the flows.
