ACG | ASSET CONSULTING GROUP

Economic Overview

- The equity rally stalled in August as the Fitch downgrade of US debt and uncertainty around the path of interest rates weighed on sentiment
- The US job openings survey signaled a cooling labor market, with job openings and the quits rate reaching their lowest levels since early 2021
- Headline CPI rose from a 3.0% annual increase to 3.2%, although this was lower than expected. Core CPI declined slightly to 4.7%

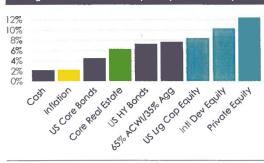

Market Returns

- Bonds outperformed with yields supporting returns as rates rose
- · Emerging markets underperformed on China weakness

invesiment strategy
Aberdeen believes that superior long-term returns are achieved in the inefficient emerging markets by buying good quality companies at a reasonable price and holding them to capitalize on strong fundamentals that drive stock prices. Bottom-up stock selection using a disciplined approach and direct company visits are the primary source of alpha for the strategy with lop-down factors incorporated during portfolio construction to provide appropriate diversification. The process starts by screening the theoretical universe of all EM stocks for those that pass a primary "quality" screen and a secondary "price" screen. The EM investment team looks to identify good quality companies selling at reasonable prices from a "buy list" created by regional equity teams. The buy list of approximately 200 stocks has passed both the quality and price screen/filter. The quality screen identifies companies with a core franchise, sustainable earnings growth, quality management, a strong balance sheet, and interests aligned with shareholders. Companies passing the quality screen are then screened on price to determine fair valuation and downside risk potential. Company visits are an integral part of the process. All stocks are ranked from one (best) to five (worst) with a minimum score of three necessary for inclusion in the portfolio. Research reports are circulated and discussed at bi-weekly investment meetings with team decision-making. The portfolio typically consists of 50-70 stocks.

Investment Thesis

Aberdeen has been managing international and emerging market equities for many years with a great deal of success. The firm has extensive resources and research capabilities with over 250 portfolio managers and analysts across the globe, including a large team dedicated to emerging markets. Regional investment teams (and analysts) provide their best ideas using on-the-ground research and management visits from their area to the emerging markets team who is responsible for constructing the highest quality portfolio. This is a large asset manager that is a leader in international and emerging market research with a very experienced and talented investment team. This strategy is detensive and has benefited during difficult market environments because of its process which is focused on buying high quality companies at the right price. The strategy has grown quite large, but it is a moderately diversified, low turnover strategy with most holdings being mid to large cap names, so capacity and liquidity are less of an issue.

Commentary

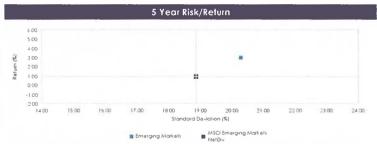

Aberdeen's Global Emerging Market stralegy underperformed the MSCI Emerging Markets (Net) Index by 54 bps in the quarter. An overweight position and poor stock selection in China (one of the worst performing countries in the index) detracted 87 bps and was the leading detractor during the quarter. Stock selection within traditional growth sectors (consumer discretionary and health care) detracted approximatley! 100 bps. Stock selection in traditional value sectors (financials) contributed 71 bps to relative performance. Il was announced during the quarter that Adam Montanaro, Investment Director, Global Emerging Market Equities would be leaving the firm in July 2023. Adam's role and coverage will be absorbed by the existing portfolio construction group members; Devan Kaloo, Joanne Irvine, Nick Robinson, Kristy Fong, Xin-Yao Ng, and Fraser Harle.

Axiom Investors

Emerging Markets

For the Period Ending June 30, 2023

Firm Details

Axiom International was officially formed on September 1, 1998, as an independent investment advisor specializing in managing international equity portfolios by Andrew Jacobson and his team of research analysts. Prior to forming Axiom, the investment team was responsible for developing and managing the international equity strategy at Columbus Circle Investors (CCI), a division of PIMCO Advisors LP. Axiom is completely independent and 100% owned by the current employees of the firm. The research team has the advantage of working together in one location. All portfolio managers at Axiom are equity partners, have an average of 25 years' experience in the industry and have been collaborating together at Axiom for an average of 10 years.

Axiom identifies companies whose key business drivers are both improving and exceeding expectations through its systematic process of data collection, analysis and portfolio construction. Axiom employs an active, fundamental, bottom-up, growth-oriented investment discipline across all strategies firm-wide. The firm does not begin the research process with screening databases. This approach tends to be more backward looking, assumptions need to be made on luture growth and valuation metrics and there can be an inordinate amount of forecast error associated with these assumptions. Conversely, in order to reduce forecast error and better understand how enterprises currently operate and will perform going forward, Axiom's investment learn conducts detailed fundamental stock analysis to identify companies whose current operational metrics are materially pacing ahead of market expectations, where these operational improvements are not yet reflected by the market and where these improvements will lead to earnings upgrades and share price appreciation. The investment team monitors these operational metrics against consensus expectations in real time and Axiom seeks to provide 200 - 300 basis points of outperformance over a full market cycle by investing in dynamic growth opportunities.

Investment Thesis Axiom is a 100% employee owned investment boutique with no outside equity interests. The investment team has the advantage of implementing one investment discipline, logether, in one location across synergistic asset classes. The idea generation and portiolic construction process is clearly defined and repeatable through sizing positions based upon a cross-section of quality and growth dynamism. The goal is to concentrate positions in the highest quality companies where the team has a wide difference of opinion relative to the market in the future growth profile (growth dynamism).

Axiom's Emerging Markets strategy underperformed the MSCI Emerging Markets Index (Net) by 186 bps during the quarter. Stylistic headwinds were the primary drivers of relative underperformance for the quarter and for the full one-year period ending June 2023. Unlike in the US were growth strongly outperformed value by approximately 24%, value outperformed in emerging markets by approximately 4% over the most recent one-year period. Similarly, in the US large cap's outperformed small caps by approximately 16%, however; within emerging markets, small caps outperformed large caps by approximately 7%. Axiom's growth-orientation and bigger-cap bias were the leading drivers of relative underperformance for the one-year period. Collectively these stylistic headwinds detracted approximately 500 bps. For the most recent quarter, they missed the massive "meme-like" rally within smaller cap potential benefactors of artificial intelligence, some of which were up 200-300%. From a positioning standpoint, they have added to mid-cap names particularly within India (infrastructure) and Mexico (cement and reshoring).

The focused product offering (five strategies), team structure and senior advisors are designed to provide local knowledge and idea generation across the full opportunity set of emerging markets. Opportunistic strategy that seeks to capture the full opportunity set of emerging and frontier marekts through a blend of top-down and bottom up analysis which is supported by a uniquely deep and diverse team of 20+ investment professionals across 14 nationalities, speaking 17 different languages with offices in Miami, London, and Singapore. Bottom-up fundamental company analysis is complemented by a top down macroeconomic risks/opportunities assement which results in a thematic approach across the entire emerging and frontier landscape. The team views diversification in multiple layers not just in terms of stocks but themes, industries, sectors, countries, regions and market capitalization. This is the flagship strategy of a focused shop, offering five strategies including Emerging Markets Small Cap, Frontier, China, and Latin America) all of which serve as a feeder fund into the Emerging Markets strategy.

Commentary

The Emerging Markets strategy underperformed the MSCI Emerging Markets (Net) by 144 bps in the second quarter. All of the underperformance came during April and May as the strategy outperformed by 203 bps during the month of June. Relative underperformance early in the quarter was driven by the fund's positioning in China, particularly within exposure to the property industry (Skshu Paint and Country Garden Services) and communication services sector (Tencent and Kuaisho Technology). Overall, an overweight and poor stock selection in China detracted 149 bps and accounted for substantially all of the relative underperformance for the quarter. The strategy added to Country Garden Services and trimmed TSMC on valuation. They also remain positive on the growth outlook for China as policymakers have taken actions to accelerate economic growth via rate cuts and other measures. From a sector perspective they have maintained an overweight position to materials and belive increased demand and supply issues should lead to price appreciation. In their view, energy transition will continue to drive long-term growth in the sector and benefit companies that are growing production.

GOVERNMENT SHORT TERM INVESTMENT FUND

Investment Objective

The Northern Trust Collective Government Short Term Investment Fund is an investment vehicle for cash reserves, that offers a competitive rate of return through a portfolio of obligations of the U.S. Government, its agencies or instrumentalities, and related money market instruments.

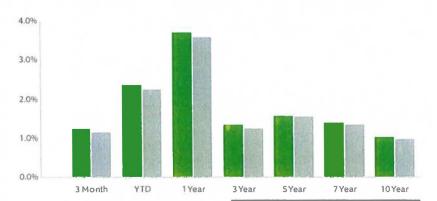

Principal preservation and liquidity management are the prime objectives.

Investment Approach

The fund invests only in high quality securities. Within maturity, and sector diversification guidelines, the fund invests in those securities with the most attractive yields.

PERFORMANCE DISCLOSURES

Past performance is not indicative of future results. Returns for periods greater than one year are annualized and represent geometrically linked rates of return. Gross performance returns shown do not reflect the deduction of investment management/advisory fees, assume the reinvestment of dividends and capital gains, and are net of transaction costs and other expenses (such as administrative expenses). Performance results will be reduced by the fees incurred in the management of the account. Investment management/advisory fees are charged outside of the trust. Performance results (or fees) are provided by Northern Trust Investments, Inc. Index performance returns do not reflect any management fees, transaction costs or expenses. It is not possible to invest directly in any index.

To illustrate the effect of the compounding fees, assuming an annual gross return of 1% and an annual investment management fee of 0.15%, a \$10,000,000 account would grow in value over five years to \$10,510,100 before fees and \$10,431,683 after deduction of fees. The fee illustration represents the deduction of the highest applicable management fee. Investment management/advisory fees are described in Northern Trust Investments, Inc. Form ADV Part 2A.

There can be no assurance that any portfolio investment objectives will be achieved. Risk controls and models do not promise any level of performance or guarantee against loss of principal. Any discussion of risk management is intended to describe Northern Trust's efforts to monitor and manage risk but does not imply low risk.

Northern Trust Asset Management is composed of Northern Trust Investments, Inc., Northern Trust Global Investments Limited, Northern Trust Fund Managers (Ireland) Limited, Northern Trust Global Investments Japan, K.K., NT Global Advisors, Inc., 50 South Capital Advisors, LLC, Northern Trust Asset Management Australia Pty Ltd and investment personnel of The Northern Trust Company of Hong Kong Limited and The Northern Trust Company.
