## INFORMATION AT YOUR FINGERTIPS.

### PRICING

These rates are in effect for the Tampa Convention Center beginning September 15, 2025, and apply to contracted clients of the Convention Center for production, meeting rooms, all wall power, and all other power requirements for interior and exterior spaces. The charges will be paid directly to Edlen. Pricing is for the event's duration (up to 7 days) and is not a daily charge. For more information and production estimates, please contact our office at (813) 517-1232. Prices are subject to change.

Labor, material, and cabling utilized to distribute power will be billed accordingly.

### POWER DISTRIBUTION

Edlen Electrical Exhibition Services is the exclusive in-house provider of all temporary utilities, including all facility-wide wall and floor outlets, power distribution, and labor for utility services and distribution at the Tampa Convention Center. This includes labor and material rentals for safe power distribution in the exhibit halls, ballrooms, breakout rooms, exterior space, and other production areas, excluding any specialty A/V or rigging cabling for wall, ceiling, or floor utility access.

Please note that there is no complimentary power for show management or exhibitor purposes throughout the venue, including wall outlets in meeting rooms.

Edlen will not tape down or ramp cords that are not Edlen property, such as specialty A/V or rigging cabling running to and from production distros or panels.

All equipment, regardless of power source, must comply with federal, state, and local codes. Edlen reserves the right to inspect all electrical devices and connections to ensure compliance with all codes for which labor charges can be incurred. Under license, Edlen is required to refuse connections where the Exhibitor, Show Planner, or Exhibitor Appointed Contractor's (EAC) wiring or equipment is not under electrical codes or secured adequately in high-traffic areas for safety purposes.

The outlet rates do not include equipment, connections, special wiring, or distribution of the outlets to other locations within the work area space or booth locations. Distribution to all other locations requires labor, material rental fees, and floor plans with measurements and orientation by each work area. Floor plans must be submitted 21 days prior to move-in, or additional fees will be charged.

There is a minimum charge of 1 hour for installation and 1/2 hour for removal. For assistance in calculating labor, contact [tampa@edlen.com](mailto:tampa@edlen.com).

*Based on on-site audits, additional charges, including outlets, materials, and prevailing labor rates, may be applied at the conclusion of events. By placing an order, exhibitors and show organizers agree to accept Edlen's payment policy and the contract terms and conditions.*

### POWER REQUIREMENTS

The UL listing plate on the back of the equipment identifies the required amperage/wattage. For multiple pieces of equipment, add the amperage/wattage to get the total needed. Before placing your utility order, submit a photo of the plug or adapter to [tampa@edlen.com](mailto:tampa@edlen.com) to ensure proper connectivity and power distribution. Additional charges for material rentals may apply.

All equipment, regardless of power source, must comply with federal, state, and local codes. Edlen reserves the right to inspect all electrical devices and connections to ensure compliance with all codes for which labor charges can be incurred. Edlen is required to refuse connections where the Exhibitor's or Show Planner's wiring or equipment is not under electrical codes.

### MINIMUM POWER AVAILABILITY

The minimum power order is five amps/500 watts and can be placed directly through Edlen Electrical Exhibition Services.

Orders can be placed by visiting [Online Ordering - Edlen - Log into Online Ordering](#). Once there, Exhibitors must create an account and search for the specific event. Wall power throughout the Tampa Convention Center is not complimentary for show management, production, and exhibit purposes and will be charged based on the wall outlet amperage prevailing rates.

For Show Planners, the Edlen team will prepare a customized estimate based on your event's specifications, including equipment sets with measured and marked floor plans by the work area. Contact [tampa@edlen.com](mailto:tampa@edlen.com) to request an estimate.

Standard wall and other permanent building utility outlets or sockets are not part of the exhibit or production space and may not be used unless electrical services have been ordered through Edlen.

## INFORMATION AT YOUR FINGERTIPS.

### GENERATORS

Generators are not permitted inside the Tampa Convention Center property. Generators used outside must be pre-approved and ordered directly through Edlen Electrical Exhibition Services.

### CEILING DROPS

Ceiling drops utilize electrical access from the ceiling as required for lighting, rigging, etc. Ceiling drops are available for booth, lighting, and rigging motor power in the exhibit halls and ballrooms and can be ordered directly through Edlen Electrical Exhibition Services by contacting [tampa@edlen.com](mailto:tampa@edlen.com). Prevailing outlets, material rentals, and labor rates will apply.

### 24-HOUR POWER

Power is provided 24 hours a day for the duration of the show. There are no daily or consumption charges in addition to the services ordered. However, we cannot guarantee uninterrupted service due to events beyond our control (e.g., power outages).

Additional charges, including outlets, materials, and prevailing labor rates, may be applied after events based on onsite audits.

### FLOOR PLANS

To ensure proper utility placement for exhibitors, a booth floor plan showing the placement of electricity, internet, telephone, etc., must be submitted 21 days before move-in to ensure a timely installation. Failure to provide floor plans with measurements may result in services not being installed and additional costs being charged. For exhibitor booth floor plan templates, please reference the Edlen Electrical or Plumbing order form in your exhibitor kit or request them from [tampa@edlen.com](mailto:tampa@edlen.com)

For show organizers, we highly recommend that you work with your designated general contractor, decorator, or audiovisual and production partner to prepare floor plans for the areas marked where power is needed. Your Edlen Event Services Manager can also help and advise on approximate placement to ensure efficient power distribution based on the room and equipment set for your specific event requirements. For blank floor plan templates or CAD exhibit hall/meeting room shells, please contact your Event Manager for the Tampa Convention Center.

### LIGHTING

The Tampa Convention Center is equipped with high-intensity, energy-efficient LED lighting. If you need additional lighting, please get in touch with Encore, our in-house AV provider, which is listed under our Service Partners: <https://www.tampa.gov/tcc/services-and-ordering>.

### MOTOR POWER FOR RIGGING

You must order motor power separately with Edlen when ordering rigging through Encore, the exclusive in-house partner for all rigging needs. For each 100 pounds, an additional 30-AMP 208v 3-Phase outlet will be added to your order. Prevailing outlets, material rentals, and labor rates will apply.

### MARINE POWER AT THE TAMPA CONVENTION CENTER DOCKS

Recreational boaters can access shared power at the North and South Docks; contact the Dockmaster for further information when booking a slip reservation.

For show organizers using the docks as an extension of exhibit space or special events, Edlen will install temporary power based on the specific requirements and can provide a customized estimate. As a guide, please note that orders must be received ten days before the first day of move-in. Please get in touch with Edlen's General Manager Michele Cardello at 407-401-1066 or [mcardello@edlen.com](mailto:mcardello@edlen.com) for more information.

# WE ARE THE POWER PEOPLE.

Our Tampa team is dedicated to providing safe, affordable, on-time utility services, and superior customer service.

Edlen is the exclusive provider of temporary utility services at the Tampa Convention Center. Make the most of your upcoming show with the Edlen Advantage:

- We provide proactive customer service to make the power portion of your event seamless.
- Edlen helps you pre-plan the most efficient and cost-effective solutions to meet exhibitor and show organizer utility requirements.
- We provide estimates in advance and the final invoice before the show closes.
- Our team is comprised of highly skilled electricians and event services managers to make your show at the Tampa Convention Center a success!
