KEY

- S Shade Tree
- U Understory Tree
- P Palm Tree
- D Deciduous Tree
- E Evergreen Tree
- F Flowering Tree
- N Non-flowering Tree
- O Excurrent Tree
- O Decurrent Tree

DEFINITIONS

- Shade Tree** - tree with a broad canopy planted primarily for its ability to provide shade
- Understory Tree** - tree that is adapted to grow beneath canopy of larger trees
- Deciduous Tree** - tree that will shed its leaves annually
- Evergreen Tree** - a tree that remains green throughout the year
- Flowering Tree** - tree that produces noticeable flowers as one of its prominent features
- Excurrent Tree** - tree form characterized by a single, dominant, central trunk that extends to the top of the tree, with lateral branches that are shorter and less prominent resulting in a pyramidal or cone-like shape
- Decurrent Tree** - tree form characterized by a rounded or spreading crown
