Notes:

- [1] Typology: Shade; Coniferous; Ornamental; Palm
- [2] Small [0-20' avg height]; Medium [20-40' avg height]; Large [40' or higher avg height]. Average ["avg"] height dimension is at time of full growth/maturity.
- [3] Source: FL Dept of Agricultural & Consumer Services, Florida Grades and Standards for Nursery Plants 2015. Any species not listed above must obtain approval of natural resources coordinator and will adhere to Florida Grades & Standards criteria for use of species not listed and determination of Matrix Type. Type 1: Tall & Wide; Type 2: Tall & Narrow; Type 3: Short/Wide & Multi-Trunked; Palm.
- [4] Source: Tree Species Ratings for Florida, January 2016, International Society of Arboriculture, FL Chapter. Rating % assigned to a specific tree upon evaluation and determination of its existing condition. Refer to sec. 27-285.4.1 for Rating % and tree condition equivalency factors. The higher the Rating % = the higher suitability in Tampa's urban environment (assuming proper placement & general maintenance).
- [5] Species Rating not available from Florida ISA. Use Condition Rating factor as Species Rating factor in Mitigation calculation for grand trees.
- [6] Growth Rate: refers to the vertical increase in growth. Slow: ≤ 12" per year; Moderate: 13"-24" per year; Fast: ≥ 25" per year. (Source: Dirr, M., Manual of Woody Landscape Plants, pub. Jan. 1990)
- [7] Species listed as Category II on the 2017 Florida Exotic Pest Plant Council List of Exotic Species. Specie may be planted and/or retained, but no credit shall be factored into mitigation formula. See also sec. 27-284.1.2(2).
- Reference : "Y" means "Yes," "N" means "No," "NOT AVAIL" means "not available at time of adoption of this document."
