

YARD WASTE TO COMPOST

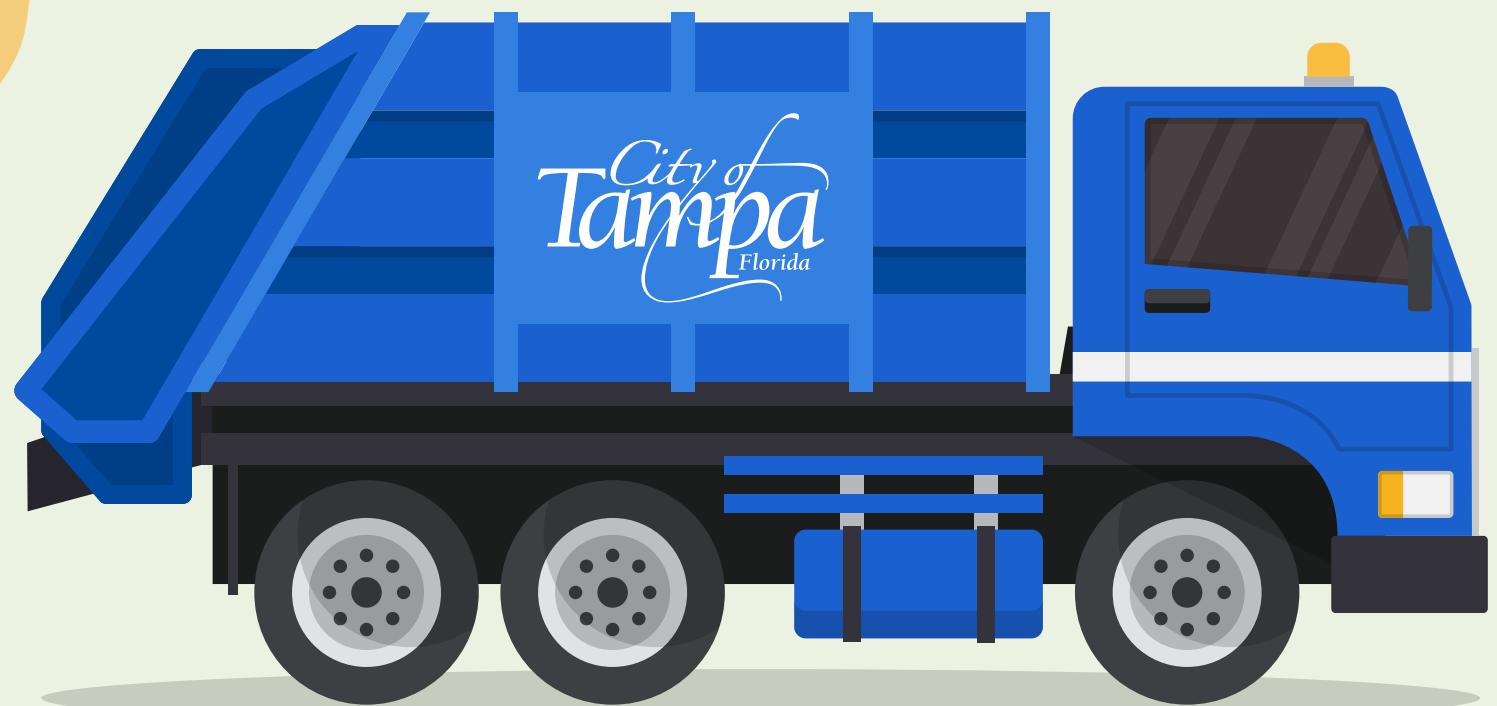

City of Tampa Solid Waste is taking steps to divert materials from the waste stream and create compost!

Set your yard waste out for collection using these methods:

- Reusable 32-gallon container
- Yard waste paper bags
- Bundled with jute twine

17%
of Tampa's residential
waste is yard waste

Approximately
75,000 lbs.
of CO₂ emissions eliminated per year

Our team delivers it to a local composter to be processed. All of the yard waste carries valuable nutrients, that when composted, can be used to rejuvenate agricultural or local soil.
