**Express Permit
 Fire Sprinkler and Alarm
 Alterations, Additions, Modifications**

Fast Track Fire Sprinkler Permit and Fire Alarm Permit processes are intended to expedite the permitting process for alterations, additions, or modifications of projects with twenty (20) fire sprinkler heads or less for each automatic fire sprinkler system riser, projects with ten (10) fire alarm devices or less for a single system. Approval will be based on inspection of completed work. To utilize the process, the scope of work must meet the following criteria:

Fast Track Fire Sprinkler Permit

- The scope of work is for twenty (20) heads or less for each automatic fire sprinkler system riser and;
- The work is not a part of a new system and;
- All work is visible and easily accessible to the Fire Inspector and;
- Any alterations, additions, or modifications shall be marked with a piece of painter's tape of at least one square inch, or marked with a temporary tag easily removable after final inspection, and;
- All applicable permits must be obtained and fees paid at the Construction Services Division, and;
- All work will be performed in accordance with **Florida Fire Prevention Code (2010 edition), NFPA 13 Installation of Sprinkler Systems (2007 Edition), NFPA 13D Standard for the Installation of Fire Sprinkler Systems in One- and Two-Family Dwellings and Manufactured Home (2007 Edition), NFPA 13R Standard for the Installation of Fire Sprinkler Systems in Residential Occupancies Up to and including Four Stories in Height (2007 Edition)** and any other applicable Laws, Standards or Codes, and;
- Shop drawings, if appropriate, and equipment specifications and listing information must be present on site at the time of inspection.
- A building floor plan must accompany the application showing the location(s) in the building where work will be performed. This plan must be 11 X 17, and may be a shop drawing, layout, estimators plan, or similar rendering.

Fast Track Fire Alarm Permit

- The scope of work is for ten (10) or less initiating and/or warning devices for a single fire alarm system, and;
- The devices are listed for the system being modified, and;
- The work is not a part of a new system, and;
- All work is visible and easily accessible to the Fire Inspector, and;
- Any alterations, additions, or modifications shall be marked with a piece of painter's tape of at least one square inch, or marked with a temporary tag easily removable after final inspection, and;
- All applicable permits must be obtained and fees paid at the Construction Services Division, and;
- All work will be performed in accordance with **Florida Fire Prevention Code (2010 Edition), NFPA 72 National Fire Alarm Code (2007 Edition)** and any other applicable Laws, Standards or Codes.
- Shop drawings, if appropriate, and equipment specifications and listing information must be present on site at the time of inspection.
- A building floor plan must accompany the application showing the location(s) in the building where work will be performed. This plan must be 11 X 17, and may be a shop drawing, layout, estimators plan, or similar rendering.

I certify that the scope of work conforms to the above criteria, and that this application shows a true representation of construction to be accomplished under this permit, and that no work has commenced prior to the issuance of this permit. I further certify that the owner will be notified of the above information regarding the Notice of Commencement and applicability of the lien law. It is understood that any false information or deviation from the original documents will render this permit issued under this application null and void, unless approved by the building official. The permit issued under this application is invalid after 6 months if the project is not started for which this permit was issued, and there will be no refund. I agree to conform to all building department regulations. **After the work is completed, a Fire Inspector must perform a final inspection. Call 813-274-7900.**
