

**Tampa's
weather may
change,
but water
conservation
is still
essential.**

August 2026

Our recent rainfall is a welcomed sight, but Tampa remains in an “extreme” drought. The Southwest Florida Water Management District’s (SWFWMD) Water Restrictions are still in effect.

See the reverse side for details.

You can make a difference. If you have an automatic sprinkler system, turn it OFF after a good rain. Just 1 inch of rainfall provides enough water to your lawn for an entire week. While you’re at it, check your irrigation system for leaks or broken sprinkler heads to avoid wasting water.

**Conservation is key to helping our water resources bounce back.
Thank you for making every drop count.**

**You can request a FREE outdoor conservation kit
which includes a rain gauge at tampaconnect.com!**
