A detailed statement of work is as follows:

Task One: Scope Meeting with the City and Compilation of Existing Information
MCE shall coordinate a meeting with the City and other pertinent representatives of the City to discuss goals and objectives for the project. As a result of this meeting, we will develop or refine the scope of work and develop a schedule noting specific milestones to achieve during the course of the project. MCE will identify the City's role in the project including specific meetings and coordination requirements.

MCE will request existing and available information to assist with the design and permitting process. A list of pertinent information is as follows:
- Copy of existing State Submerged Lands Lease, SSLL (CADD format if available)
- Copy of upland boundary survey (CADD format if available)
- Copy of topographic survey (CADD format if available)
- Copy of available geotechnical reports
- Copy of available utility asbuilts
- Copy of any or all previous design plans, permits and other pertinent site information

Task Two: Bathymetric / Topographic Data Collection

As required for design and permitting, MCE shall conduct a bathymetric survey of the waterway adjacent to the park extending from the existing bulkhead or shoreline to the edge of the navigation channel. The bathymetric survey shall be conducted using an automated hydrographic system comprised of a survey launch equipped with a marine grade, single-beam sounder, differential global positioning system and computer-based navigation / data collection system.

As necessary, a topographic survey shall be conducted of the project upland area encompassing the horizontal and vertical location of the existing bulkhead and docks, walkways, above-ground utilities, stormwater collection systems, trees and all other physical, above-ground features pertinent to the design of marine improvements. The survey shall cover the area extending from the bulkhead landward no less than fifty (50) feet. Sufficient data shall be collected to assess current drainage patterns.

Upon completion of the data collection activities, detailed and fully dimensioned maps will be prepared depicting all structures and topographic features at the facility along with bathymetric contours of the waterway within and along the perimeter of the marina.

Task Three: Geotechnical Investigation

Soil borings are required for the design of the bulkhead and dock structures. MCE will coordinate with the City regarding the acquisition of required geotechnical information and shall arrange for the services of a local, reputable geotechnical engineering firm, if required. Borings are generally specified for a minimum of fifty (50) feet of penetration with the objective of achieving at least ten (10) blows per foot over the last five (5) feet. We shall delineate where the borings shall be performed and require that the geotechnical report contain at a minimum graphical logs showing a description of the soil layers, water table, material classification and the "blow counts" (N values). No less than four (4) borings conducted as close to the shoreline as practical is recommended for the project.

Task Four: Conceptual Design Services

MCE will prepare conceptual plan alternatives for the bulkhead, multi-use dock replacement, canoe / kayak launch, upland boardwalks, and associated upland project components. Conceptual plans will include a dimensioned plan layout of proposed marine improvements including alternatives that may warrant review and consideration by the City. Various shoreline stabilization systems will be evaluated including vertical structures, sloped rock revetments, living shorelines and/or a combination, thereof. Any existing structures or support facilities to be salvaged and incorporated into the new plan will be depicted. Conceptual plans will include boundary information (provided by others), proposed limits of the existing State Submerged Lands Lease (SSLL) (if applicable), bathymetric and topographic data, and other existing site features. Conceptual plans will be presented to the City for review and comments.

Task Five: Pre-Application Meeting(s)

Using the information compiled and collected under Tasks One, Two and Three along with the conceptual plans prepared under Task Four, MCE shall schedule and attend pre-application meetings with Hillsborough County, Florida Department of Environmental Protection (FDEP) and U.S. Army Corps of Engineers (USACE). The purpose of the pre-application meetings is to discuss the overall project including previous permitting activities, historical site uses, project constraints, results of field investigations and / or specific submittal requirements. MCE will discuss environmental issues relating to the project and specifically identify what site investigations may be required as part of the application process. Results of the meetings will help to determine optimum permitting strategies and assist in the preparation of permit applications.

Task Six: Application Preparation

Based upon the results of pre-application meetings, MCE shall prepare permit applications including all required permit sketches pertaining to the marine improvements. This shall encompass separate applications as required for each of the agencies having jurisdiction over the project. Necessary attachments to each of the applications will include aerial exhibits, maps of existing conditions, adjacent site boundary exhibits, submerged lands lease exhibits, bathymetric survey exhibits, marine resources exhibits, plan and section details of the bulkhead ad dock improvements, construction methodology details and any other pertinent details or information. Services pertaining to marine resources mapping and the submerged lands lease are outlined below. The permit applications including all sketches and exhibits will be submitted to the City for review and signature. Upon approval the packages will be submitted to the agencies to initiate processing.

Sub-Task A: Marine Resources Mapping

A marine resources investigation will be required for the project. The scope of the investigation will be addressed as part of the pre-application meetings with state, federal and county agencies.

Sub-Task B: Sovereignty Submerged Lands

Any change to the docks or piers over state-owned submerged lands including modifications to the existing State Submerged Lands Lease (SSLL) boundaries will require a modification to the SSLL. Consultation with the local FDEP office and/or coordination with the Division of State Lands in Tallahassee will be necessary. MCE will prepare the new SSLL sketch and description or as an alternate coordinate this task with a local Land Surveyor that may have been tasked with the property boundary survey.

Task Seven: Permit Application Processing

MCE shall perform the necessary services pertaining to processing permits through the FDEP, USACE and Hillsborough County, as applicable. This shall include responses to questions or comments submitted by agencies through Request(s) for Additional Information (RAI's). In addition to preparing formal responses this may entail revisions to permit sketches or exhibits and additional field investigations. Depending on the complexity of agencies questions, meetings at local offices of County, State and Federal agencies may be required. Upon receipt of an RAI, the City will be notified to discuss specific questions or comments raised by the agency. Input from the City may be required depending on the nature of the question or comment. Should supplemental field investigation be required by the agencies, which are considered beyond the scope of this proposal, MCE will request additional compensation via supplemental proposal.

Task Eight: Construction Plans and Specifications

MCE will prepare final construction plans and specifications for the marina structures including bulkhead, multi-use dock, canoe / kayak launch and boardwalks. Plans will include a fully detailed and dimensioned plan layout of all structures along with section details and specifications. In summary, construction plans will entail the following:

Bulkhead

Bulkhead construction plans will include a detailed plan layout of the structures with coordinates relative to the project datum. Plans will include typical sections with details and dimensions of the vertical wall exposure, sheet type, length and width, concrete cap and lateral support system. Plans will include comprehensive specifications for each of the bulkhead structural components including other pertinent aspects of construction such as:

- Sheetpile type, minimum section modulus, coating requirements (if required) and criteria pertaining to installation. Alternate sheetpile types will be discussed with the City.
- Concrete specifications for the concrete cap including criteria for casting and finishing.

- Details of the lateral support system including criteria pertaining to required design capacity and installation.
- Backfill and compaction requirements.

Structural components will be designed for optimum performance with specific consideration for durability and low maintenance, practicality, material availability, aesthetics and cost of construction. The product selection process will be specifically coordinated with the City to ensure that all objectives and expectations are achieved.

Alternate Shoreline Stabilization Systems

In addition to, or as an alternate, as determined during the conceptual design phase, MCE will prepare plans and specifications for other shoreline stabilization systems including but not limited to rock revetments and/or living shoreline systems. Plans will include typical sections with details and dimensions of the structures. Details of the living shoreline system including specifications for pre-manufactured components, installation protocols, planting information and potential monitoring requirements will be included on the plans.

Multi-Use Dock, Canoe / Kayak Launch and Upland Boardwalk

MCE will prepare final construction plans and specifications for the multi-use dock, fishing piers, canoe / kayak launch and upland boardwalk providing access to the waterway. This will include a final plan layout of all structures that are fully detailed and dimensioned along with section details. Structural details of the dock structures including support piles, sub-structure, decking and above deck components will be included. Any or all prefabricated components and/or products will be based on information provided by dock manufacturers chosen by MCE for the project. In summary, construction plans will entail the following:

- Demolition plans and specifications
- Plan layout of docks, piers, canoe / kayak launches and boardwalks with appropriate ties to property/SSLL boundaries and navigation channels. Horizontal layout will be based on the SPCS.
- Support pile layout including pile details (type, size and length)
- Typical section details
- Potable water and fire suppression, as applicable
- General notes and specifications

Upland Project Components and Site Furnishings

The necessity for plans and specifications pertaining to upland project components and site furnishings including access walkways, site lighting, signage, kayak racks, wash-down areas, fish cleaning stations, benches, trash receptacles, drinking fountains and landscaping will be determined during the conceptual design activities (Task Four). Planning and landscape architectural services, if required for the design of upland amenities, will be addressed via supplemental proposal and would be an additional cost.

Task Nine: Construction Observations and Project Certification

Sea Diversified will conduct observations during construction and assist MCE with professional services on an as-needed basis throughout the construction phase of the project. The intent of these services is to ensure that the work is completed in accordance with final plans and specifications as designed by Sea Diversified and outlined in the above Task Items

Firm's maintenance of insurance coverage as required herein is a material element of the Agreement and the failure to maintain or renew coverage or provide evidence of same (defined to include without limitation Firm's affirmative duty to provide from time to time upon City's request certificates of insurance, complete and certified copies of Firm's insurance policies, forms, and endorsements, information on the amount of claims payments or reserves chargeable to the aggregate amount of coverage(s) whether during the term of the Agreement or after as may be requested by the City in response to an issue or potential claim arising out of or related to the Agreement to which Firm's insurance obligations hereunder may apply or possibly help mitigate) may be treated as a material breach of the Agreement. Should at any time Firm not maintain the insurance coverages required, City at its sole option (but without any obligation or waiver of its rights) may (i) terminate the Agreement or (ii) purchase such coverages as City deems necessary to protect the itself (charging Firm for same) and at City's option suspending Firm's performance until such coverage is in place. If Firm does not reimburse City for such costs within 10 days after demand, in addition to any other rights, City shall also have the right to offset such costs from amounts due Firm under any agreement with the City. All provisions intended to survive or to be performed subsequent to the expiration or termination of the Agreement shall survive, including without limitation Firm's obligation to maintain or renew coverage, provide evidence of coverage and certified copies of policies, etc. upon City's request and/or in response to a potential claim, litigation, etc.

The City reserves the right from time to time to modify or waive any or all of these insurance requirements (or to reject policies) based on the specific nature of goods/services to be provided, nature of the risk, prior experience, insurer, coverage, financial condition, failure to operate legally, or other special circumstances. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City. No representation is made that the minimum insurance requirements are sufficient to cover Firm's interests, liabilities, or obligations. Required insurance shall not limit Firm's liability.

Firm acknowledges and agrees Firm and not the City is the party in the best position to determine applicability (e.g. "IF APPLICABLE"), confirm, and/or verify its insurance coverage. Acceptance by the City, or by any of its employees, representatives, agents, etc. of certificates or other documentation of insurance or policies pursuant to the terms of this document and the Agreement evidencing insurance coverages and limits does not constitute approval or agreement that the insurance requirements have been met or that coverages or policies are in compliance. Furthermore, receipt, acceptance, and/or approval of certificates or other documentation of insurance or policies or copies of policies by the City, or by any of its employees, representatives, agents, etc., which indicate less coverage than required does not constitute a waiver of Firm's obligation to fulfill these insurance requirements.
