EXHIBIT A -SCOPE OF SERVICES

City of Tampa Howard F. Curren AWTP JC 1 Odor Control Replacement Design 25-D-00021

Phase 1- Scope of Services through Preliminary Design

INTRODUCTION

The purpose of this project is to design a replacement odor control system for Junction Chamber No. 1 (JC 1) located at the Howard F. Curren Advanced Wastewater Treatment Plant (HFCAWTP). The Wastewater Department has previously performed studies for the odor control system replacement and has a preliminary design recommendation for the new system.

However, the City has received recent odor complaints since the development of the preliminary design recommendations. Therefore, the sensitivity of this project has increased, and the approach may need to be more conservative. The City desires to be a good neighbor and has requested that Webster Environmental Associates, Inc. (WEA) re-evaluate the current, preliminary design recommendations accordingly.

The City has requested that WEA conduct this effort in two phases as described below:

<u>Phase 1</u>- Perform an evaluation of the current, preliminary design recommendations to confirm that they are in line with the increased sensitivity of this project. This evaluation will include a review of the previous studies, review of historical odor data, collection of odor samples, development of an odor dispersion model, and an evaluation of alternatives. Additionally, the City has requested general recommendations for operating the existing JC 1 odor control system which may reduce offsite odors.

<u>Phase 2</u>- Prepare construction documents based on the agreed upon, preliminary design approach. Additionally, this scope will include bidding phase services and engineering support during the construction phase. The Phase 2 scope will be submitted at a later date as an amendment to the contract.

The proposed scope of work for Phase 1 has been organized into the following tasks:

- Task 1: Kick-off Meeting and Data Review
- Task 2: Odor Sampling and Testing Program
- Task 3: Odor Dispersion Modeling
- Task 4: Odor Control Alternatives Evaluation
- Task 5: Technical Memorandum
- Task 6: Owner's Allowances

SCOPE

Task 1 - Kick-off Meeting and Data Review

Objective: Within 10 days of receipt of the Notice to Proceed, a project Kick-off meeting will be held.

WEA Activities: The purpose of the kick-off meeting will be to introduce the project team to the City, and discuss the goals and objectives of the project. In addition, an information request will be prepared and submitted to the City. Once the information is received, it will be reviewed by the project team to determine if any additional information will be required.

In conjunction with this meeting, a site visit will be conducted so that the project team can review the current system and discuss operational parameters with City staff.

At a minimum, WEA anticipates reviewing the following information:

- Previous odor control studies conducted at JC 1
- Previous year of H₂S monitoring data collected by the City
- Existing odor control system chemical usage data
- Effects of recent Bioxide feed at East Tampa PS
- JC 1 odor control system as-built drawings

Task 2 - Odor Sampling and Testing Program

Objective: Capture current odor data at JC 1 which reflects the current conditions (such as the recent addition of calcium nitrate at the East Tampa PS). This data will be used to evaluate the preliminary design criteria of the new system, develop the odor dispersion model, and provide recommendations for the operation of the existing system.

WEA Activities: WEA will develop an odor sampling and testing program based on an evaluation of existing data and past WEA experience. WEA will travel to the HFCAWTP and conduct the following sampling and testing:

- Collect up to four (4) air samples for overnight delivery to St. Croix Sensory Laboratory for odor panel analyses of odor thresholds (measured in Dilution to Threshold (D/T)).
- Collect up to four (4) air samples for overnight delivery to ALS or St. Croix Sensory Laboratory for reduced sulfur compound (RSC) concentration analyses.
- Instantaneous measurement of H₂S concentration will be collected along with each odor sample.
- H₂S data loggers will be deployed to log continuous H₂S concentrations at up to three (3) locations.
- Measurement of airflow rates associated with the existing odor control system.
- Measurement of differential pressure inside JC 1 to determine if structure is under negative pressure. Readings will be taken with all aeration blowers in operation and with two (2) blowers in operation as currently operated

Air sampling will be conducted in accordance with industry standard air sampling techniques. WEA provides all sampling devices, tools, instruments and laboratory analyses for this work.

Task 3 - Odor Dispersion Modeling

Objective: Develop an odor dispersion model which will be used in the development of design criteria of the new system and for potential operational recommendations of the existing system.

WEA Activities: WEA will conduct atmospheric dispersion modeling of odors using the EPA recommended AERMOD model. This will assist in in the development of design criteria of the new system (i.e. – performance requirements, stack height, stack velocity, etc.) and for potential operational recommendations of the existing system.

Odor isopleths maps will be generated and plotted on aerial photography for each modeling scenario which will illustrate Odor Strength and Odor Frequency. Odor Strength isopleths predict the peak odor levels generated by the model at any point in the study area. These isopleths are an indicator of the highest odor strength (worst case) that may be generated by the particular odor scenario studied. Odor Frequency isopleths predict the number of times per year an offsite odor may be detectable at any point in the study area. For example, a person standing at a point on the 100 isopleth would expect to experience a detectable odor 100 times per year. Meteorological data will be obtained from the nearest meteorological station. Terrain data near the plant will also be input into the model.

Task 4 - Odor Control Alternatives Evaluation

Objective: Evaluate odor control alternatives based on the analysis of data (past and present), dispersion modeling, and project goals. WEA anticipates that the following goals apply (at a minimum):

- Minimal downtime of the existing JC 1 odor control system during construction
- Robust odor mitigation and dispersion to mitigate offsite odors
- Effective treatment of potential spikes in hydrogen sulfide (H₂S)
- Effective treatment of non-H₂S odorous compounds and odors

WEA Activities: WEA will compile and analyze the test data obtained from the sampling and testing program and dispersion modeling. WEA will then evaluate odor control alternatives based on the project goals. WEA will develop preliminary design recommendations which shall include the following:

- Technology selection
- Calculated airflow requirements
- Calculated inlet loading parameters for H₂S, RSCs, and odor
- Performance requirements for H₂S, RSCs, and odor
- Vessel sizing
- Foul air fan sizing

- Equipment location and layout
- NFPA 820 compliance
- Opinion of Probable Cost (AACE Class IV, -30% to +50%) which shall include capital cost and operation and maintenance cost

Task 5 - Technical Memorandum

Objective: Create a draft and final Technical Memorandum (TM)

WEA Activities: WEA will develop and submit a TM which shall include the following:

- Background
- Data review summary
- Odor sampling and testing results
- Odor dispersion modeling results
- Odor control alternatives evaluation
- NFPA 820 compliance
- Recommendations (includes preliminary design criteria, equipment layout, and AACE Class IV opinion of probable capital and operation and maintenance cost)
- Preliminary construction sequence for maintaining operation of existing system while new system is constructed

A draft TM shall be submitted for review by the City. This task includes an onsite meeting between WEA, AECOM, and the City to review the TM. WEA shall revise the TM based on feedback obtained in the meeting and resubmit a final TM. The final TM shall serve as the agreed upon approach for the project and as the basis for developing the scope for the detailed design, bidding and services during construction efforts.

This report is not intended to be an extensive preliminary design report but instead will focus on the necessary components to ensure the proposed approach will meet the City's goals.

WEA Deliverables: Draft and final TMs

Task 6 - Owner's Allowances

Objective: An Owner's Allowance has been included to be used for services not covered in this Scope of Work.

No work shall be performed, no payment shall be made prior to written authorization by the City based on a scope and fee mutually agreed upon by the City and WEA.

Notwithstanding anything herein to the contrary, any charge or increase to allowance amounts must be approved by the City in advance and in writing. If not so approved, the charge will be deemed to be at WEA's sole cost without reimbursement. The only allowance allowed are those clearly identified in the agreement. Any remaining allowance shall belong 100% to the City.

WEA Activities: A contingency amount of \$300,000 has been included to cover any engineering services beyond those outlined in this Scope of Services.

Firm shall provide pay for, and maintain insurance against claims for injuries to persons (including death) or damages to property which may arise from or in connection with the performance of the Agreement (including without limitation occupancy and/or use of certain property/premises) by Firm, its agents, representatives, employees, suppliers, subtenants, or subcontractors (which term includes subconsultants, as applicable) of any tier subject to the terms and conditions of this document. Firm's maintenance of insurance coverage as required herein is a material element of the Agreement and the failure to maintain or renew coverage or provide evidence of same (defined to include without limitation Firm's affirmative duty to provide from time to time upon City's request certificates of insurance complete and certified copies of Firm's insurance policies, forms, and endorsements, information on the amount of claims payments or reserves chargeable to the aggregate amount of coverage(s) whether during the term of the Agreement or after as may be requested by the City in response to an issue or potential claim arising out of or related to the Agreement to which Firm's insurance obligations hereunder may apply or possibly help mitigate) may be treated as a material breach of the Agreement. Should at any time Firm not maintain the insurance coverages required. City at its sole option (but without any obligation or waiver of its rights) may (i) terminate the Agreement or (ii) purchase such coverages as City deems necessary to protect itself (charging Firm for same) and at City's option suspending Firm's performance until such coverage is in place. If Firm does not reimburse City for such costs within 10 days after demand, in addition to any other rights, City shall also have the right to offset such costs from amounts due Firm under any agreement with the City. All provisions intended to survive or to be performed subsequent to the expiration or termination of the Agreement shall survive, including without limitation Firm's obligation to maintain or renew coverage, provide evidence of coverage and certified copies of policies, etc. upon City's request and/or in response to a potential claim, litigation, etc.

The City reserves the right from time to time to modify or waive any or all of these insurance requirements (or to reject policies) based on the specific nature of goods/services to be provided, nature of the risk, prior experience, insurer, coverage, financial condition, failure to operate legally, or other special circumstances. Firm acknowledges and agrees Firm and not the City is the party in the best position to determine applicability (e.g. "IF APPLICABLE"), confirm, and/or verify its insurance coverage. Acceptance by the City, or by any of its employees, representatives, agents, etc. of certificates or other documentation of insurance or policies pursuant to the terms of this document and the Agreement evidencing insurance coverages and limits does not constitute approval or agreement that the insurance requirements have been met or that coverages or policies are in compliance. Furthermore, receipt, acceptance, and/or approval of certificates or other documentation of insurance or policies or copies of policies by the City, or by any of its employees, representatives, agents, etc., which indicate less coverage than required does not constitute a waiver of Firm's obligation to fulfill these insurance requirements.

<u>WAIVER OF SUBROGATION</u> – With regard to any policy of insurance that would pay third party losses, Firm hereby grants City a waiver of any right to subrogation which any insurer of Firm may acquire against the City by virtue of the payment of any loss under such insurance. Firm agrees to obtain any endorsement that may be necessary to affect such waiver, but this provision shall apply to such policies regardless.

<u>WAIVER/RELEASE AGREEMENT</u> – Where Firm has a defined group of persons who might be exposed to harm (e.g. participants in an athletic event/program, volunteers) any waiver or release agreement used by Firm whereby such persons (and their parent/guardian as applicable) discharge Firm from claims and liabilities, shall include the City, its elected officials, departments, officers, officials, employees, and volunteers to the same extent as Firm.
